

To the Chairman and Members of the Commission: Please note my opposition to the proposed Broadband Over Power Line (BPL) authority now being considered. BPL would unnecessarily increase the amount of man-made interference to high-frequency communications not only for the Amateur Service but other users of the spectrum as well. At a time that noise pollution is steadily on the increase, the Commission would be ill advised to add to the existing chaos by permitting BPL, even on an experimental basis. While BPL may be considered an advancement by some special interests, it in reality would be a giant step backward for this Commission. Please vote against this authority. Thank you.

Sincerely, Fred Bonavita
